Arctic Fox (A Day in the Life: Polar Animals): Written by ...

In summertime, the Arctic fox is active both during the day and night in the 24 hour daylight of the Arctic. In winter, they will even forage onto the pack-ice for food, scavenging polar bear kills. They eat mainly small rodents, particularly lemmings, birds' eggs and the young of ground-nesting birds.

Arctic Fox | Highland Wildlife Park

In the winter they live in almost perpetual darkness and in the summer they live through almost 24 hours of sunlight a day. The arctic fox lives in dens that are dug into the side of a hill, cliff or riverbank. In winter they dig a series of interconnecting tunnels in the deep snow where the family live.

"A Day in the Life", Arctic Fox - Humour Me

The Arctic fox is a burrow dweller and may be active at any time of day. It feeds on whatever animal or vegetable material is available and often follows polar bears to feed on the remains of their kills. During summer it preys primarily on rodents, such as lemmings; however, it may also take

birds.
