Critical appraisal is the systematic evaluation of clinical research papers in order to establish: Does this study address a clearly focused question? Did the study use valid methods to address this question?

Checklists. Methodology checklist 1: systematic reviews and meta-analyses. Checklist. Notes. Methodology checklist 2: randomised controlled trials. Checklist. Notes. Methodology checklist 3: cohort studies. Checklist.

~~Critical appraisal checklists | BMJ Best Practice~~

Critical appraisal checklists. There are numerous checklists available to act as aide memoires for evaluating studies and they can be very useful. However, a key issue in critically appraising

studies is that, while it can be thought of in terms of being an academic exercise of 'ticking the boxes', the reason why we are doing it is to evaluate what weight we can put on the findings, and to evaluate how far we can generalise the results from trials into routine practice to inform clinical ...

~~Critical appraisal checklists | BMJ Best Practice~~

Critical appraisal checklists. Our checklists are critical appraisal tools to help identify the many ways that error and bias can distort research results. We have used our own experience and research to develop a collection of checklists, designed to support the critical reading of a research study. The checklists can help assess any potential sources of bias in the research study that can be recorded in a narrative summary.
