Jakarta Tomcat is not only the most commonly used open source servlet engine today, it's become the de facto standard by which other servlet engines are measured. Powerful and flexible, it can

be used as a stand-alone web server or in conjunction with another server, like Apache or IIS, to run servlets or JSPs. But mastery of Tomcat is not easy: because it's as complex as it is complete. Tomcat: The Definitive Guide answers vexing questions that users, administrators, and developers alike have been asking. This concise guide provides much needed information to help harness Tomcat's power and wealth of features. Tomcat: The Definitive Guide offers something for everyone who uses Tomcat. System and network administrators will find detailed instructions on installation, configuration, and maintenance. For users, it supplies insightful information on how to deploy Tomcat. And seasoned enterprise Java developers will have a complete reference to setting up, running, and using this powerful software. The book begins with an introduction to the Tomcat server and includes an overview of the three types of server configurations: stand-alone, in-process, and out-of-process. The authors show how directories are laid out, cover the initial setup, and describe how to set the environment variables and modify the configuration files, concluding with common errors, problems, and solutions. In subsequent chapters, they cover: The server.xml configuration file Java Security manager Authentication schemes and Tomcat users The Secure Socket Layer (SSL) Tomcat JDBC Realms Installing servlets and Java Server Pages Integrating Tomcat with Apache Advanced Tomcat configuration and much more. A unique study of the link between theology and culture from a sociological perspective which addresses the issue of the pursuit of enchantment in the context of postmodernity. Sociology is applied to sociology itself to discern its own domestic response to theological readings of culture. A novel reading of Simmel, Bourdieu and Weber in relation to the Swiss Catholic theologian, Hans Urs von Balthasar, produces a controversial critique of assumptions regarding religious belief in the context of debates on secularisation and postmodernity.

The Hyatt Regency Hotel, Columbus, Ohio was the venue for the 1995 Cryogenic Engineering Conference. The meeting was held jointly with the International Cryogenic Materials Conference. Jim Peeples, of CVI, Inc., was conference chairman. Columbus is the home of the Battelle Memorial Institute, a pioneer in cryogenic materials development; the home of CVI, Inc., and Lake Shore Cryotronics, Inc., two leading manufacturers of cryogenic equipment; and it is the home of Ohio State University, where research on liquid helium has long been conducted. The program consisted of 315 CEC papers, nearly the same number as for CEC-91. This was the second largest number of papers ever submitted to the CEC. Of these, 252 papers are published here, in Volume 41 of Advances in Cryogenic Engineering. Once again the volume is published in two books. This volume includes a number of photographs taken during the awards lunch on July 20, 1995. Photographs have often been taken during the conferences, but they have never been used. The pictures are of the awardees, the conference chairs, and the organizers. They are distributed throughout the books on pages that would otherwise have been blank. The pictures can be found on the following pages: 28, 232, 334, 536, 640, 826, 990, 1032, 1202, 1462, 1682, 1888, and 1994.

Since its inception, the Journal of Environmental Psychology has demonstrated its pre-eminence through publishing original, inno-

vative papers. By bringing them together in one volume, ready access has been provided to the first-hand accounts of a range of explorations that are central to the growth and development of environmental psychology itself. There is now an agreement amongst most environmental psychology researchers that particular locations within the environment do harbour rich significance for individuals and groups. There is a great deal of productive debate about the cognitive and affective processes that give rise to this significance, but it is clear that the significance of places can include both deep emotional attachment and more abstract aesthetic enjoyment. Psychologists have been rather reluctant to examine the content of personal meanings, except in the intensity of the therapeutic interview, leaving such explorations to literary critics. The present volume goes some way to redress that balance and show the value of tackling meaning head on, rather than through the lens of structure and form. This volume will therefore be of value beyond environmental psychology in showing the value of studying meanings in context and the ways in which they give our world significance.
