"The Pleiades are a star cluster sitting on the shoulder of the bull in the constellation Taurus. This group of stars sets below the horizon every year in early May. Since ancient times in the northern hemisphere the setting of the Pleiades has marked the time to begin planting. May Eve and May Day festivals began the planting preparations with their cleansing and fertility ceremonies ... Moon gardening is an ancient practice based on the moon's pull on Earth's water bodies. The moon's gravitational force affects more than the tides. Ground water tables and the subtler flow of water

in soil and plants are also affected"--Volume text.

With today's schedules, few people are able to enjoy their gardens during prime daylight hours. But there is a way you can delight in the fragrance and beauty of flowers after dark: Plant a night-blooming garden! Also known as moon gardens, night-blooming gardens are expressly designed for evening enjoyment. While attractive during the day, they take on a whole new look and feel at dusk, casting a magical spell. Pale-colored flowers reflect light from the setting sun and the rising moon, shining luminously and giving the garden an almost mystical glow. Fragrances seem more alluring. Silvery foliage shimmers tremulously as the evening breezes dance by. An aromatic, night-blooming garden offers a peaceful and tranquil spot to rest

and relax at the end of the day. It is the perfect place for a casual summer party, an evening reception, a romantic tryst, or a quiet retreat to reflect and rejuvenate the senses.

GROW MORE FOR LESS - SHEER LUNACY LEARN THE SECRETS OF MOON GARDENING. SUITABLE FOR ALL GARDENS. FROM POSTAGE-STAMP ALLOTMENTS TO COUNTRY ESTATE This is not your average gardening book. In it you will discover how to increase your crop yield and grow healthier plants and better tasting food, while reducing work in your garden and forking out less on fertiliser. This seemingly impossible win-win is achieved by planting and reaping in tune with the phases of the moon. Lunar gardening has been around for as long as man has pulled food from the soil. It was practised by the Incas and the Native Americans, and is still followed by the Maoris and rural communities in

Eastern Europe. Because it works. But with the mass adoption of fertilisers achieving quicker results for a need-it-now-generation, these techniques have been all but forgotten by the modern gardener. Until now. Head gardener at Cornwall's famous Tresillian Estate, John Harris has researched, studied and put in to practice the principles of gardening by the phases of the moon for more than forty years. The results he's achieved are nothing short of astonishing. He has never watered his garden (even during the drought of 1976), he only grows organically and yet he's won numerous show awards and prizes for the size, abundance and taste of his produce. In *Moon Gardening*, he shows you how you can do the same by following a few simple principles. Moon gardening is not some groundless fad. It's been followed for thousands of years with great success. Anyone who's met John Harris knows he's one of the most down-to-earth people you could wish to meet. This book, written in his own inimitable style, is packed full of tips that improve results, anecdotes that inspire and resources you can rely on. Its ultimate aim is to pass on John's treasure trove of horticultural knowledge to future genera-

tions, so that we can all get more from our garden. 'THE OLD WAYS STILL WORK THERE MAGIC - MARK DIACONO, DAILY TELEGRAPH

Biodynamic gardening means taking a holistic approach to the garden and being aware of the interrelatedness of the soil, plants, and vegetables. The principles of biodynamics also bring a spiritual aspect to the meditative art of gardening, emphasizing the influence of invisible energies, such as the lunar cycles, on the garden. Biodynamic practices are used increasingly often in agriculture and many people are interested in adopting this holistic, natural approach in their own gardens but are unsure how to get started. In *'Lunar and Biodynamic Gardening'*, Matthew Jackson gives an easy-to-follow guide to getting started with biodynamics. You will discover how to take advantage of the natural rhythms of the moon, by planning your gardening activities to coincide with the most favorable conditions in the sky. For example, during a waxing moon, the earth is exhaling, and it is best to sow non-root plants. During a waning moon, the earth is inhaling, and biodynamic gardeners should water and fertilize their crops. Matthew al-

so guides you through making biodynamic preparations to keep your soil "alive", understanding your garden or allotment as part of a bigger web of life and demonstrates the importance of working with nature rather than trying to dominate it. With step-by-step illustrations for 25 projects, explanatory diagrams, and stunning color photographs, it's easy to see how biodynamic techniques can work for any gardener.
