Nurse practitioners are licensed, independent practitioners who practice autonomously and in coordination with health care professionals and other individuals. They provide primary and/or specialty nursing and medical care in ambulatory, acute, and long-term care settings. NPs are registered nurses with specialized, advanced education and clinical practice competency to provide health care for diverse populations in a variety of primary care, acute, and long-term care settings.

Request Permissions. This article describes the development, implementation, and appraisal of clinical practice guidelines. It also explores ways of increasing their use in nursing. Clinical practice guidelines are "systematically developed statements to assist practitioner decisions about appropriate health care for specific clinical circumstances." 1 Guidelines can be used to reduce inappropriate variations in practice and to promote the delivery of high quality, evidence-based health ...
