Jurisprudence or legal theory is the theoretical study of law. Scholars of jurisprudence seek to explain the nature of law in its most general form and provide a deeper understanding of legal reasoning, legal systems, legal institutions, and the role of law in society.

Jurisprudence : theory and context. [Brian Bix] -- The sixth edition has been substantially revised to take into account the most recent scholarly work, and to elaborate on many of the key ideas and arguments.

A broad overview of the main topics and central issues in legal theory, Jurisprudence provides students with an informative introduction. Academically challenging and often controversial ideas are presented in a lucid, straightforward manner with special attention given to legal positivism, natural law theory, legal realism, law and economics, critical race theory, and feminist legal theory as ...

"Jurisprudence: Theory & Context is aimed primarily at students new to the study of jurisprudence, but also offers benefits to scholars in the field. It explains the often complex and difficult...

An understanding of jurisprudence and legal methodology is a crucial step towards achieving a better account of international law in IR theory. But many of the flaws in IR's idea of law stem also from the theoretical foundations of constructivism - the school of thought which engages most frequently with law.

Jurisprudence is aimed at students new to the study of legal philosophy, also offering new ideas and perspectives that will be of interest to established scholars. Bix seeks to explain the often complex and difficult ideas in Jurisprudence clearly, but in a way that avoids distortion of the ideas through over-simplification.
