Group E - Group F = 12 month interval. Description The NIH Stroke Scale is a critical component of acute stroke assessment. The American Stroke Association, in conjunction with the American Academy of Neurology (AAN) and the National Institute of Neurological Disorders and Stroke (NINDS) has developed this CME/CE certified,...

#### AHA Learning Center - American Heart Association's ...

Only sensory loss attributed to stroke is scored as abnormal and the examiner should test as many body areas (arms [not hands], legs, trunk, face) as needed to accurately check for hemisensory loss. A score of 2, "severe or total sensory loss," should only be given when a severe or total loss of sensation can be clearly demonstrated.
