In the wake of the financial crisis and Great Recession, the health of state and local pension plans has emerged as a front burner policy issue. Elected officials, academic experts, and the media alike have pointed to funding shortfalls with alarm, expressing concern that pension promises are unsustainable or will squeeze out other pressing government priorities. A few local governments have even filed for bankruptcy, with pensions cited as a major cause. Alicia H. Munnell draws on both her practical experience and her research to provide an abroad perspective on the challenge of state and local pensions. She shows

that the story is big and complicated and cannot be viewed through a narrow prism such as accounting methods or the role of unions. By examining the diversity of the public plan universe, Munnell debunks the notion that all plans are in trouble. In fact, she finds that while a few plans are basket cases, many are functioning reasonably well. Munnell's analysis concludes that the plans in serious trouble need a major overhaul. But even the relatively healthy plans face three challenges ahead: an excessive concentration of plan assets in equities; the risk that steep benefit cuts for new hires will harm workforce quality; and the constraints plans face in adjusting future benefits for current employees. Here, Munnell proposes solutions that preserve the main strengths of state and local pensions while promoting needed reforms. The vast majority of Canadians are blissfully unaware that everyman, woman and child in Canada now owes a \$35,000 share of government debt and must pay this back, with interest! Make no mistake, this debt will change our country and affect every single Canadian in the decades to come. You may think you have planned for your retirement and are safe, but the government must find a way to recover this borrowed money, and they can only do that by raising your taxes and reducing your hard-earned benefits. How did this debt come about, and why can't we simply pay it off? Pension Ponzi lays the blame squarely at the feet of the politicians who refused to stand up to Canada's public sector unions. The fact is Canada's public sector, which accounts for 20% of the workforce, has been grossly overpaid relative to their counterparts in the private sector with cushy pensions paid for with your taxes and new debt. There is no denying that the country does not have the financial resources to ensure that the next generation of Canadians will have the same standard of living as

the ones before it-or to support our growing seniors population. Meeting our public sector pension obligations will break the current social safety net that is a pillar of the Canadian way. Can you escape this bleak future? Can you afford to live longer? Nationally-recognized pension expert Bill Tufts and award-winning journalist Lee Fairbanks explore how this catastrophe came about and then suggest ways that government can fix what's broken, and how you as an individual can protect yourself from the financial calamity that is about to engulf Canada.
