357PR9 - OLSEN MOHAMMAD

At this Time, In this Place is a love story between an American Christian woman and a Japanese Buddhist man. Before graduating from college, Pamela Wentworth lost herself, winding up pregnant and married to a man she did not love. In 1985, Pam's family hosts a Washburn University foreign exchange student, Takuho Osaki, who becomes Pam's best friend. Pam teaches Tuk about restoring an old house; Tuk teaches Pam how to speak Japanese. Both teach each other about their culture - but the lessons do not end there. A mysterious box of letters brings some revelations for the two about what it really means to love someone. Through tragedy and heartache, Tuk helps Pam to find her true self, while he walks his own path of self-sacrifice. The supporting story is the love story between Charles Henry Lerrigo, an immigrant from England, who marries Annabell Barry from Topeka, Kansas in 1895. Lerrigo becomes a medical doctor with a passion for writing adventure books. His work directing the Tuberculosis Association earned him the pen name of "The Christmas Seal Doctor." The Lerrigo's were the original owners of the American Four-square home that Pamela's family restores in College Hill. People who enjoy learning about other cultures and religions will like this book, as well as those who like old house restoration. The book is well grounded in the history of Topeka, Kansas, Washburn University and the College Hill neighborhood.

Comprehensive and easy to read, this authoritative resource features the most up-to-date, research-based blend of practice and theory related to the issues that impact nursing management and leadership today. Key topics include the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. Research Notes in each chapter summarize relevant nursing leadership and management studies and show how research findings can be applied in practice. Leadership and Management Behavior boxes in each chapter highlight the performance and conduct expected of nurse leaders, managers, and executives. Leading and Managing Defined boxes in each chapter list key terminology related to leadership and management, and their definitions. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key chapter concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions that allow you to reflect on chapter content, critically analyze the information, and apply it to the situation. A new Patient Acuity chapter uses evidence-based tools to discuss how patient acuity measurement can be done in ways that are specific to nursing. A reader-friendly format breaks key content into easy-to-scan bulleted lists. Chapters are divided according to the AONE competencies for nurse leaders, managers, and executives. Practical Tips boxes highlight useful strategies for applying leadership and management skills to practice.

Morgan Strebler's Ice Cold System is one of the only systems that has been designed from the ground up to work in the real world, with 10 years of experience and constant evolution, it is now ready to be released. Imagine using any Tarot Deck, Runes, Palm, or even regular playing cards (or no oracle at all) and being able to tell names and secrets that have happened to them, medications they take, sexual orientation, and exact problems when they were children, even certain gambling pleasures of theirs, and doing it completely cold! Nothing is ever written down or said, no actual mentalism or magic gimmicks techniques or subtleties are used. The Ice Cold System was made with one goal in mind, to go up to anyone anywhere anytime, or even over the phone, and be able to tell them secrets about themselves, using life events that they have never told anyone! With no fishing, no Barnum statements, and again no magic ploys used whatsoever.

Michael Breggar, the award-winning author of "Auto-Magic" (seen monthly in The Linking Ring) is back with another collection of amazing, fun and well-constructed magical pieces. As in his previ-

ous best-selling book the "Five Roads to Vegas," some the effects have been previously published, but they have been further refined with more detailed explanations and performance notes. True to the "Auto-Magic" mantra, the routines in this book are professional and practical yet none require sleight of hand. As Michael always stresses, since the performance is the effect, the tricks need to be clever, layered, deceptive and, most of all, entertaining. Michael helps you navigate through each routine with careful descriptions and well-honed patter. However, you can easily adapt each effect to your own style. Contents: Back To The Launching Pad - Michael's addition the "Out of this World" landscape, with a big difference...it's done with the cards face up! Already a favorite of several working pros. ACAAN Opener - An old principle on top of an old U. F. Grant card trick turns it into a funny, yet still amazing Any Card at An Number effect. A Whole Empty Brain - Yet another old card principle that has been redressed and relayered to surprise even the knowledgeable. Two spectators show they are in mental sync by a very fair selection of cards from a shuffled deck. Not only are their cards mates, the rest of the deck suddenly turns blank! Not Just Another Book Test (A.K.A. "The Two-Fingered Book Test") - Michael received an amazing amount of emails on this effect. Finally, a book test that seems organic and makes contextual sense. Or were the emails more about the "AKA" part of the title?! The Dating Game - Playing around with yet another old principle, Michael conjures up a fun effect where famous couples' names are listed on index cards. The cards are then torn in half and fully mixed, thus "separating" the couples. Using random throws of dice, the spectators magically reunite the couples. Usually! Mixed Emojis - based on a Dan Harlan version of a Martin Gardner concept, a fabulous three-phase routine is demonstrated using domino-sized tiles depicting mobile phones with everyone's favorite excuse for not typing complete text messages! Cra-Ker-Jack - Michael invents a ridiculously bizarre and funny new casino game, with rules that change on a whim. The spectators are treated to an amazing routine of card magic where their random decisions find the mates to four selected cards and ultimately produce the four aces. The Price Is Write - From Michael's corporate repertoire, in figuring the "best price" for a silly-looking pen, the spectators write out all different prices on price tags. Through a very fair and random process of elimination, one tag is selected. The price on the tag exactly matches the amount of change in a small envelope, sitting on the table untouched from the beginning. Drawn Conclusion - Michael's favorite trick and frequent closer. From a shuffled deck, a spectator selects a face down card. They place their fingers lightly on top in an effort to read the card through their fingertips. The magician then tries to read the reading and draws the image on a paper. Is it the correct card? Well, sorta. Plus, two essays written in Michael's breezy style with more tips and presentational ideas than you can shake a stick at. If that's your idea of a good time.

Imperial Leather chronicles the dangerous liaisons between gender, race and class that shaped British imperialism and its bloody dismantling. Spanning the century between Victorian Britain and the current struggle for power in South Africa, the book takes up the complex relationships between race and sexuality, fetishism and money, gender and violence, domesticity and the imperial market, and the gendering of nationalism within the zones of imperial and anti-imperial power.

Linebound is an old Eastern Townships word referring to those who have been banned for legal reasons from crossing the nearby border between Quebec and Vermont. Peter Turner's novel is the story of a country lawyer navigating the borderlands of life. Charlie England, an Anglo born in 1975 on his family's 200-year old Eastern Townships farm rides both sides of the line between English and French culture, the vividness of life and bleakness of death, and the profound changes from a centuries old way of life to a world with no apparent regard for what it has lost. With humour, humility, and honesty, we trace Charlie's path between harsh and hilarious early lessons in farm and country life to football scholarships and heartache at Laval. Punctuated by absurd but uniquely human legal cases threaded through a married life that rolls through valleys of passion then isolation, Linebound is the story of a man caught in a moment of social, cultural, and personal upheaval and

the messy space of difference and tolerance that is vital to making it all work.

Imperialism as we knew it may be no more, but Empire is alive and well. It is, as Michael Hardt and Antonio Negri demonstrate in this bold work, the new political order of globalization. Their book shows how this emerging Empire is fundamentally different from the imperialism of European dominance and capitalist expansion in previous eras. Rather, today's Empire draws on elements of U.S. constitutionalism, with its tradition of hybrid identities and expanding frontiers. More than analysis, Empire is also an unabashedly utopian work of political philosophy.

In 1996 physicist Alan Sokal published an essay in Social Text--an influential academic journal of cultural studies--touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. Now in Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere "narrations" or social constructions.

On December 28, 1992, two days before her tenth birthday, Katie Beers disappeared. She had left for an outing with a close family friend, John Esposito, and her whereabouts remained mysterious as the year drew to a close and her family grew frantic, fearing the worst. On January 13th, Katie was found alive in a secret, dungeon-like vault beneath Esposito's Bay Shore, Long Island house. Families nationwide followed the story of Katie's heartwrenching ordeal, as she bravely survived the isolation until her nearly miraculous rescue from a setting reminiscent of The Silence of The Lambs. Katie's harrowing story reveals a chilling side of human nature, even in the seemingly peaceful suburbs. And her fate as the smiling survivor of a troubled family raises disturbing questions about the plight of children across America: children like Katie, whose trust can be so easily betrayed.

In this unique work, eighteen of the most influential and significant figures in the various subareas of behavior therapy (from behavior analysis through cognitive therapy) are brought together to discuss their work and the sources and influences that affected it. At times moving, profound, and humorous, it casts a new and perhaps more human light on the most influential movement in behavioral health in the latter part of the 20th century. These intellectual biographies range in tone and intensity as each author uses their own particular style to convey their views about the field and their individual impact on it. For those interested in the behavioral and cognitive movement, this book is a must have since it is the only book to have chronicled the individual histories of the founders of the applied behavioral movement before they are lost forever.

Social Movements is a comprehensive introduction and critical analysis of collective action in society today. In this new edition, the authors have updated all chapters with the most recent scientific literature, expanded on topics such as individual motivations, new media, public policies, and governance. Draws on research and empirical work across the social sciences to address the key questions in this international field. New edition expands on topics such as individual motivations, new media, public policies, and governance. Has been redesigned in a more user-friendly format.

The world is caught in the mesh of a series of environmental crises. So far attempts at resolving the deep basis of these have been superficial and disorganized. Global Political Ecology links the political economy of global capitalism with the political ecology of a series of environmental disasters and failed attempts at environmental policies. This critical volume draws together contributions from twenty-five leading intellectuals in the field. It begins with an introductory chapter that introduces the readers to political ecology and summarizes the books main findings. The following

seven sections cover topics on the political ecology of war and the disaster state; fuelling capitalism: energy scarcity and abundance; global governance of health, bodies, and genomics; the contradictions of global food; capital's marginal product: effluents, waste, and garbage; water as a commodity, a human right, and power; the functions and dysfunctions of the global green economy; political ecology of the global climate, and carbon emissions. This book contains accounts of the main currents of thought in each area that bring the topics completely up-to-date. The individual chapters contain a theoretical introduction linking in with the main themes of political ecology, as well as empirical information and case material. Global Political Ecology serves as a valuable reference for students interested in political ecology, environmental justice, and geography.

In this exciting and challenging work, Norman Long brings together years of work and thought in development studies to provide a key text for guiding future development research and practice. Using case studies and empirical material from Africa and Latin America, Development Sociology focuses on the theoretical and methodological foundations of an actor-oriented and social constructionist form of analysis. This style of analysis is opposed to the traditional structuralist/institutional analysis which is often applied in development studies. With an accessible mix of general debate, critical literature reviews and original case study materials this work covers a variety of key development issues. Among many important topics discussed, the author looks at commoditisation, small-scale enterprise and social capital, knowledge interfaces, networks and power, globalisation and localisation as well as policy formulation and planned intervention processes. This book should be read for its desire to pursue a form of analysis that helps us to understand better (and more realistically) the kinds of development interventions and social transformations that have characterised the second half of the twentieth century and will no doubt continue to characterise future development studies.

A groundbreaking account of America's role in global capitalism. The all-encompassing embrace of world capitalism at the beginning of the twenty-first century was generally attributed to the superiority of competitive markets. Globalization had appeared to be the natural outcome of this unstoppable process. But today, with global markets roiling and increasingly reliant on state intervention to stay afloat, it has become clear that markets and states aren't straightforwardly opposing forces. In this groundbreaking work, Leo Panitch and Sam Gindin demonstrate the intimate relationship between modern capitalism and the American state, including its role as an "informal empire" promoting free trade and capital movements. Through a powerful historical survey, they show how the US has superintended the restructuring of other states in favor of competitive markets and coordinated the management of increasingly frequent financial crises. The Making of Global Capitalism, through its highly original analysis of the first great economic crisis of the twenty-first century, identifies the centrality of the social conflicts that occur within states rather than between them. These emerging fault lines hold out the possibility of new political movements transforming nation states and transcending global markets.

Outstanding collection of nearly 200 crowd-pleasing mental magic feats requiring no special equipment. Author offers insider's tips and expert advice on techniques, presentation, diversions, patter, staging, more.

The Internet revolution has come. Some say it has gone. In *The Future of Ideas*, Lawrence Lessig explains how the revolution has produced a counterrevolution of potentially devastating power and effect. Creativity once flourished because the Net protected a commons on which widest range of innovators could experiment. But now, manipulating the law for their own purposes, corporations have established themselves as virtual gatekeepers of the Net while Congress, in the pockets of media magnates, has rewritten copyright and patent laws to stifle creativity and progress. Lessig weaves the history of technology and its relevant laws to make a lucid and accessible case to protect the sanctity of intellectual freedom. He shows how the door to a future of ideas is being shut just as technology is creating extraordinary possibilities that have implications for all of us. Vital, eloquent, judicious and forthright, *The Future of Ideas* is a call to arms that we can ill afford to ignore.

'Life in the Flesh' offers a new spiritual philosophy of the body, contrasting sources from the Christian tradition with contemporary voices in philosophy and theology.

The late nineteenth century saw a re-examination of artistic creativity in response to questions surrounding the relation between human beings and automata. These questions arose from findings in the 'new psychology', physiological research that diminished the primacy of mind and viewed human action as neurological and systemic. Concentrating on British and continental culture from

1870 to 1911, this unique study explores ways in which the idea of automatism helped shape ballet, art photography, literature, and professional writing. Drawing on documents including novels and travel essays, Linda M. Austin finds a link between efforts to establish standards of artistic practice and challenges to the idea of human exceptionalism. Austin presents each artistic discipline as an example of the same process: creation that should be intended, but involving actions that evade mental control. This study considers how late nineteenth-century literature and arts tackled the scientific question, 'Are we automata?'

The polygraph, often portrayed as a magic mind-reading machine, is still controversial among experts, who continue heated debates about its validity as a lie-detecting device. As the nation takes a fresh look at ways to enhance its security, can the polygraph be considered a useful tool? The Polygraph and Lie Detection puts the polygraph itself to the test, reviewing and analyzing data about its use in criminal investigation, employment screening, and counter-intelligence. The book looks at: The theory of how the polygraph works and evidence about how deceptiveness and other psychological conditions affect the physiological responses that the polygraph measures. Empirical evidence on the performance of the polygraph and the success of subjects' countermeasures. The actual use of the polygraph in the arena of national security, including its role in deterring threats to security. The book addresses the difficulties of measuring polygraph accuracy, the usefulness of the technique for aiding interrogation and for deterrence, and includes potential alternatives such as voice-stress analysis and brain measurement techniques.

Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, *Global Nomads* develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

We commonly think of marriage as a private matter between two people, a personal expression of love and commitment. In this pioneering history, Nancy F. Cott demonstrates that marriage is and always has been a public institution. From the founding of the United States to the present day, imperatives about the necessity of marriage and its proper form have been deeply embedded in national policy, law, and political rhetoric. Legislators and judges have envisioned and enforced their preferred model of consensual, lifelong monogamy—a model derived from Christian tenets and the English common law that posits the husband as provider and the wife as dependent. In early confrontations with Native Americans, emancipated slaves, Mormon polygamists, and immigrant spouses, through the invention of the New Deal, federal income tax, and welfare programs, the federal government consistently influenced the shape of marriages. And even the immense social and legal changes of the last third of the twentieth century have not unraveled official reliance on marriage as a "pillar of the state." By excluding some kinds of marriages and encouraging others, marital policies have helped to sculpt the nation's citizenry, as well as its moral and social standards, and have directly affected national understandings of gender roles and racial difference. *Public Vows* is a panoramic view of marriage's political history, revealing the national government's profound role in our most private of choices. No one who reads this book will think of marriage in the same way again.

'Watching the president's Christmas message produces this necropolar, white-mass sensation. Seeing the video broadcast of the Christmas service in the cathedral itself, with these pathetic screens and the young worshippers slumped around them here and there, you tell yourself that God and religion deserved better. Deserved to die, yes, but not this. However, watching the presidential figure and his sonorous inanity, you tell yourself that here at least you got what you deserved. Chirac is useless – that goes without saying – but so are we all ... Uselessness of this kind has no origin: it exists immediately, reciprocally; like a shared secret, you savour it implicitly – with its warm bitterness – particularly in these cold snaps, as the very essence of the social bond. Sanc-

tioned by that other interactive uselessness – the uselessness of the screen.' World-renowned for his lively and often iconoclastic reading of contemporary culture and thought, Jean Baudrillard here turns his hand to topical political debates and issues. In this stimulating collection of journalistic essays Baudrillard addresses subjects ranging from those already established as his trademark (virtual reality, Disney, television) to more unusual topics such as the Western intervention in Bosnia, children's rights, Holocaust revisionism, AIDS, the Rushdie fatwa, Formula One racing, mad cow disease, genetic cloning, and the uselessness of Chirac. These are coruscating and intriguing articles, not least because they show that Baudrillard is – pace his critics – still susceptible and alert to influences from social movements and the world beyond the hyperreal.

A History of Modern Psychology, 3rd Edition discusses the development and decline of schools of thought in modern psychology. The book presents the continuing refinement of the tools, techniques, and methods of psychology in order to achieve increased precision and objectivity. Chapters focus on relevant topics such as the role of history in understanding the diversity and divisiveness of contemporary psychology; the impact of physics on the cognitive revolution and humanistic psychology; the influence of mechanism on Descartes's thinking; and the evolution of the third force, humanistic psychology. Undergraduate students of psychology and related fields will find the book invaluable in their pursuit of knowledge.

A pioneering examination of the folkloric qualities of the World Wide Web, e-mail, and related digital media. These studies show that folk culture, sustained by a new and evolving vernacular, has been a key, since the Internet's beginnings, to language, practice, and interaction online. Users of many sorts continue to develop the Internet as a significant medium for generating, transmitting, documenting, and preserving folklore. In a set of new, insightful essays, contributors Trevor J. Blank, Simon J. Bronner, Robert Dobler, Russell Frank, Gregory Hansen, Robert Glenn Howard, Lynne S. McNeill, Elizabeth Tucker, and William Westerman showcase ways the Internet both shapes and is shaped by folklore

"Business Ethics and Values" introduces students to the complexities and principles of ethical issues by focusing on developing ethical awareness and the ability to argue business ethics matters. A proven resource, the second edition of this text continues to present a successful blend of concrete issues and academic theory, suitable for undergraduate and postgraduate students with or without practical experience of the world of organisations. It gives as much importance to individual conscience at work as it does to socially responsible behaviour at the corporate level and within the global business world. Hallmark features: Broad coverage of the many issues in this subject ensures that students see the whole picture. The use of real-world case studies and simulations helps to stimulate debate and appreciate the multi-faceted aspects of ethical arguments. New to this edition: New material on the ethics of e-communication, sustainability and the ethical impact of globalisation ensures that students are learning from the most up-to-date material available. Further analysis of Anglo-American approaches to corporate governance and their ethical underpinnings. Short test and assignment questions at the end of each chapter help students to consolidate their learning. More simulation exercises and activities give students the opportunity to reflect on their attitudes to this engaging subject. A well-developed supplements package to support tutors and students includes an instructor's manual, PowerPoint slides and a companion website. Colin Fisher is Professor of Managerial Ethics and Values, Nottingham Business School, Nottingham Trent University. Alan Lovell is Professor of Organisational Accountability and Head of the Department of Accounting, Finance & Economics, Nottingham Business School, Nottingham Trent University.

"There is no one quite like Barbara Kingsolver in contemporary literature," raves the Washington Post Book World, and it is right. She has been nominated three times for the ABBY award, and her critically acclaimed writings consistently enjoy spectacular commercial success as they entertain and touch her legions of loyal fans. In *High Tide* in Tucson, she returns to her familiar themes of family, community, the common good and the natural world. The title essay considers Buster, a hermit crab that accidentally stows away on Kingsolver's return trip from the Bahamas to her desert home, and turns out to have manic-depressive tendencies. Buster is running around for all he's worth -- one can only presume it's high tide in Tucson. Kingsolver brings a moral vision and refreshing sense of humor to subjects ranging from modern motherhood to the history of private property to the suspended citizenship of human beings in the Animal Kingdom. Beautifully packaged, with original illustrations by well-known illustrator Paul Mirocha, these wise lessons on the urgent business of being alive make it a perfect gift for Kingsolver's many fans.

"A man loses his daughter to a car. Nothing now is what it is. It's like he's in a play - but he doesn't

know the words or the moves. The man who was driving the car is a stage hypnotist. Since the accident, he's lost the power of suggestion. His act's a disaster. For him, everything now is exactly what it is. For the first time since the accident, these two men meet. They meet when the Father volunteers for the Hypnotist's act. And, this time, he really doesn't know the words or the moves ..." "An Oak Tree is a play for two actors. The Father, however, is played by a different actor - male or female - at each performance. They walk on stage having neither seen nor read a word of the play they're in ... until they're in it. This is a breath-taking projection of a performance, given from one actor to another, from a hypnotist to their subject, from an audience to a person. An Oak Tree is a bold and absurdly comic play about loss, suggestion and the power of the mind."--BOOK JACK-ET.

How do we understand mental health problems in their social context? A former BMA Medical Book of the Year award winner, this book provides a sociological analysis of major areas of mental health and illness. The book considers contemporary and historical aspects of sociology, social psychiatry, policy and therapeutic law to help students develop an in-depth and critical approach to this complex subject. New developments for the fifth edition include: Brand new chapter on prisons, criminal justice and mental health Expanded coverage of stigma, class and social networks Updated material on the Mental Capacity Act, Mental Health Act and the Deprivation of Liberty A classic in its field, this well established textbook offers a rich and well-crafted overview of mental health and illness unrivalled by competitors and is essential reading for students and professionals studying a range of medical sociology and health-related courses. It is also highly suitable for trainee mental health workers in the fields of social work, nursing, clinical psychology and psychiatry. "Rogers and Pilgrim go from strength to strength! This fifth edition of their classic text is not only a sociology but also a psychology, a philosophy, a history and a polity. It combines rigorous scholarship with radical argument to produce incisive perspectives on the major contemporary questions concerning mental health and illness. The authors admirably balance judicious presentation of the range of available understandings with clear articulation of their own positions on key issues. This book is essential reading for everyone involved in mental health work." Christopher Dowrick, Professor of Primary Medical Care, University of Liverpool, UK "Pilgrim and Rogers have for the last twenty years given us the key text in the sociology of mental health and illness. Each edition has captured the multi-layered and ever changing landscape of theory and practice around psychiatry and mental health, providing an essential tool for teachers and researchers, and much loved by students for the dexterity in combining scope and accessibility. This latest volume, with its focus on community mental health, user movements criminal justice and the need for inter-agency working, alongside the more classical sociological critiques around social theories and social inequalities, demonstrates more than ever that sociological perspectives are crucial in the understanding and explanation of mental and emotional healthcare and practice, hence its audience extends across the related disciplines to everyone who is involved in this highly controversial and socially relevant arena." Gillian Bendelow, School of Law Politics and Sociology, University of Sussex, UK "From the classic bedrock studies to contemporary sociological perspectives on the current controversy over which scientific organizations will define diagnosis, Rogers and Pilgrim provide a comprehensive, readable and elegant overview of how social factors shape the onset and response to mental health and mental illness. Their sociological vision embraces historical, professional and socio-cultural context and processes as they shape the lives of those in the community and those who provide care; the organizations mandated to deliver services and those that have ended up becoming unsuitable substitutes; and the successful and unsuccessful efforts to improve the lives through science, challenge and law." Bernice Pescosolido, Distinguished Professor of Sociology, Indiana University, USA This book is about some topical philosophical and methodological problems that arise in the study of behavior and mind, as well as in the treatment of behavioral and mental disorders. It deals with such questions as 'What is behavior a manifestation of?', 'What is mind, and how is it related to matter?', 'Which are the positive legacies, if any, of the major psychological schools?', 'How can behavior and mind best be studied?', and 'Which are the most effective ways of modifying behavioral and mental processes?' These questions and their kin cannot be avoided in the long run because they fuel the daily search for better hypotheses, experimental designs, techniques, and treat-

ments. They also occur in the critical examination of data and theories, as well as methods for the treatment of behavioral and mental disorders. All students of human or animal, normal or abnormal behavior and mind, whether their main concern is basic or applied, theoretical or empirical, admit more or less tacitly to a large number of general philosophical and methodological principles.

Magic is everywhere, from the big spectacle celebrity of David Copperfield and Siegfried and Roy to the quirky Penn and Teller to the spooky David Blaine and Criss Angel to the endless material on YouTube. But until now, learning it has never been easy—that's all about to change with Magic, a book that does for close-up magic what How to Grill does for barbecue. Written by charismatic young magician Joshua Jay, Magic combines expertise, photographs, and step-by-step directions showing how to perform 100 tricks. Joshua Jay took home the top prize at the World Magic Seminar (the Olympics of magic) when he was just 16 years old. Now he continues to perform magic, write about magic, eat, sleep, and breathe magic. Here, he brings all his passion and knowledge to teaching magic. Each trick is broken down into the Effect, the Secret, the Set-up, and, most important, the Performance, with lessons on what to say, how to direct the audience's attention, where to keep your hands, and so on. (In other words, how to be smart about the things your audience is surprisingly clueless about.) Here are the Ten Greatest Card Tricks; tricks to dazzle a dinner date; tricks to perform for the boss (poke a hole through his shirt, then magically mend it); tricks especially for kids; and even tricks for an audience in another state—with "Australian Self-Help," you can find a participant's chosen card over the phone. It's the Aha! book for a subject whose time has come.

Books on intercultural communication are rarely written with an intercultural readership in mind. In contrast, this multinational team of authors has put together an introduction to communicating across cultures that uses examples and case studies from around the world. The book further covers essential new topics, including international conflict, social networking, migration, and the effects technology and mass media play in the globalization of communication. Written to be accessible for international students too, this text situates communication theory in a truly global perspective. Each chapter brings to life the links between theory and practice and between the global and the local, introducing key theories and their practical applications. Along the way, you will be supported with first-rate learning resources, including: • theory corners with concise, boxed-out digests of key theoretical concepts • case illustrations putting the main points of each chapter into context • learning objectives, discussion questions, key terms and further reading framing each chapter and stimulating further discussion • a companion website containing resources for instructors, including multiple choice questions, presentation slides, exercises and activities, and teaching notes. This book will not merely guide you to success in your studies, but will teach you to become a more critical consumer of information and understand the influence of your own culture on how you view yourself and others.

Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

In the 1890s the Apollo Iron and Steel Company ended a bitterly contested labor dispute by hiring replacement workers from the surrounding countryside. To avoid future unrest, however, the company sought to gain tighter control over its workers not only at the factory but also in their homes. Drawing upon a philosophy of reform movements in Europe and the United States, the firm decided that providing workers with good housing and a good urban environment would make them more loyal and productive. In 1895, Apollo Iron and Steel built a new, integrated, non-unionized steelworks and hired the nation's preeminent landscape architectural firm (Olmsted, Olmsted, and

Eliot) to design the model industrial town: Vandergrift. In *Capital's Utopia: Vandergrift, Pennsylvania, 1855-1916*, Anne E. Mosher offers the first comprehensive geographical overview of the industrial restructuring of an American steelworks and its workforce in the late nineteenth-century. In addition, by offering a thorough analysis of the Olmsted plan, Mosher integrates historical geography and labor history with landscape architectural history and urban studies. As a result, this book is far more than a case study. It is a window into an important period of industrial development and its consequences on communities and environments in the world-famous steel country of southwestern Pennsylvania.

A wheel turns because of its encounter with the surface of the road; spinning in the air it goes nowhere. Rubbing two sticks together produces heat and light; one stick alone is just a stick. In both cases, it is friction that produces movement, action, effect. Challenging the widespread view that globalization invariably signifies a "clash" of cultures, anthropologist Anna Tsing here develops friction in its place as a metaphor for the diverse and conflicting social interactions that make up our contemporary world. She focuses on one particular "zone of awkward engagement"—the rainforests of Indonesia—where in the 1980s and the 1990s capitalist interests increasingly reshaped the landscape not so much through corporate design as through awkward chains of legal and illegal entrepreneurs that wrested the land from previous claimants, creating resources for distant markets. In response, environmental movements arose to defend the rainforests and the communities of people who live in them. Not confined to a village, a province, or a nation, the social drama of the Indonesian rainforest includes local and national environmentalists, international science, North American investors, advocates for Brazilian rubber tappers, UN funding agencies, mountaineers, village elders, and urban students, among others—all combining in unpredictable, messy misunderstandings, but misunderstandings that sometimes work out. Providing a portfolio of methods to study global interconnections, Tsing shows how curious and creative cultural differences are in the grip of worldly encounter, and how much is overlooked in contemporary theories of the global. Elizabeth DeLoughrey invokes the cyclical model of the continual movement and rhythm of the ocean ('tidalectics') to destabilize the national, ethnic, and even regional frameworks that have been the mainstays of literary study. The result is a privileging of alter/native epistemologies whereby island cultures are positioned where they should have been all along—at the forefront of the world historical process of transoceanic migration and landfall. The research, determination, and intellectual dexterity that infuse this nuanced and meticulous reading of Pacific and Caribbean literature invigorate and deepen our interest in and appreciation of island literature. —Vilsoni Hereniko, University of Hawai'i "Elizabeth DeLoughrey brings contemporary hybridity, diaspora, and globalization theory to bear on ideas of indigeneity to show the complexities of 'native' identities and rights and their grounded opposition as 'indigenous regionalism' to free-floating globalized cosmopolitanism. Her models are instructive for all postcolonial readers in an age of transnational migrations." —Paul Sharrad, University of Wollongong, Australia *Routes and Roots* is the first comparative study of Caribbean and Pacific Island literatures and the first work to bring indigenous and diaspora literary studies together in a sustained dialogue. Taking the "tidalectic" between land and sea as a dynamic starting point, Elizabeth DeLoughrey foregrounds geography and history in her exploration of how island writers inscribe the complex relation between routes and roots. The first section looks at the sea as history in literatures of the Atlantic middle passage and Pacific Island voyaging, theorizing the transoceanic imaginary. The second section turns to the land to examine indigenous epistemologies in nation-building literatures. Both sections are particularly attentive to the ways in which the metaphors of routes and roots are gendered, exploring how masculine travelers are naturalized through their voyages across feminized lands and seas. This methodology of charting transoceanic migration and landfall helps elucidate how theories and people travel, positioning island cultures in the world historical process. In fact, DeLoughrey demonstrates how these tropical island cultures helped constitute the very metropolises that deemed them peripheral to modernity. Fresh in its ideas, original in its approach, *Routes and Roots* engages broadly with history, anthropology, and feminist, postcolonial, Caribbean, and Pacific literary and cultural studies. It productively traverses diaspora and indigenous studies in a way that will facilitate broader discussion between these often segregated disciplines.
