Freight - Transport for London

The key elements of the plan include; decarbonising road and rail freight by 2040, establishing a Freight Council and better land use planning that considers urban deliveries. The foundations of the strategy have already been built and Elvy will discuss them at vF&ML, while giving practical examples of how the collaborative strategy will help operators.

TextBook Planning Freight Transport On Rail An Example For ...

Welcoming the Council's call, the European Rail Freight Association pointed out that 'a well-functioning rail freight market will be crucial to achieve the objectives of the Green Deal'. It suggested that freight contingency planning 'should reflect the essential ideas of the Green Lanes concept and the regulation establishing measures for a sustainable rail market in view of the Covid-19 pandemic.'

Journal of Rail Transport Planning & Management aims to stimulate the quality of service for railway passengers and freight customers by improving the knowledge on effectiveness and efficiency of capacity management, timetabling, management and safety of railway operations. It covers the whole range of light rail, metro, heavy and high-speed railway systems.

Development proposals should aim to reduce levels of road freight, particularly during peak periods and make use of sustainable modes where possible - rail and water for larger consignments and...
