Calculate the volume, and the area of the whole surface of the cone, the radius of the base being given. Let $a = \text{radius of base}$, $Z = \text{slant side of the cone}$, $h = \text{height of the cone}$; then $h = 2na = \text{perimeter of base}$, $P = \pi a^2 = a^2 (4\pi a + 1)$. Volume = $\frac{1}{3} \pi a^2 h$ (area of base) Again, curved area = $\pi a Z$.

The term foundations is used to refer to the formulation and analysis of the language, axioms, and logical methods on which all of mathematics rests (see logic; symbolic logic). The scope and complexity of modern mathematics requires a very fine analysis of the formal language in which meaningful mathematical statements may be formulated and perhaps be proved true or false.
