India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and sud-

denly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and

in the context of the East European automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Bacteriophages, or phages, are viruses that infect bacteria and are believed to be the most abundant and genetically diverse organisms on Earth. As such, their ecology is vast both in quantitative and qualitative terms. Their abundance makes an understanding of phage ecology increasingly relevant to bacterial ecosystem ecology, bacterial genomics and bacterial pathology. Abedon provides the first text on phage ecology for almost 20 years. Written by leading experts, synthesizing the three key approaches to studying phage ecology, namely studying them in natural environments (in situ), experimentally in the lab, or theoretically using mathematical or computer models. With strong emphasis on microbial population biology and distilling cutting-edge research into basic principles, this book will complement other cur-

rently available volumes. It will therefore serve as an essential resource for graduate students and researchers, particularly those with an interest in phage ecology and evolutionary biology.

This book reassesses the philosophical, psychological and, above all, the literary representations of the unconscious in the early twentieth century. This period is distinctive in the history of responses to the unconscious because it gave rise to a line of thought according to which the unconscious is an intelligent agent able to perform judgements and formulate its own

thoughts. The roots of this theory stretch back to nineteenth-century British physiologists. Despite the production of a number of studies on modernist theories of the relation of the unconscious to conscious cognition, the degree to which the notion of the intelligent unconscious influenced modernist thinkers and writers remains understudied. This study seeks to look back at modernism from beyond the Freudian model. It is striking that although we tend not to explore the importance of this way of thinking about the unconscious and its relationship to consciousness during this period, modernist writers adopted it widely. The intelligent unconscious was particularly appealing to literary authors as it is intertwined with creativity and artistic novelty through its ability to move beyond discursive logic. The book concentrates primarily on the works of D. H. Lawrence, Virginia Woolf and T.S. Eliot, authors who engaged the notion of the intelligent unconscious, reworked it and offered it for the consumption of the general populace in varied ways and for different purposes, whether aesthetic, philosophical, societal or ideological.

The popularity of The Seven Deadly Sins dates back to the 4th Century. They enjoyed tremendous notoriety during the period we call the Middle Ages. While the popular assortment of sins is not directly from scripture, they have been the subject of many a sermon, lecture, writing and art. In his book The Seven Deadly Sins: And Why We Love Them, Steinbacher examines each in detail. He gives examples of how they effect us and how we conduct ourselves in this world. Included in this book is Steinbacher's essay, An Angel In My Garden.
