Gestalt psychology, school of psychology founded in the 20th century that provided the foundation for the modern study of perception. Gestalt theory emphasizes that the whole of anything is greater than its parts. That is, the attributes of the whole are not deducible from analysis of the parts in isolation. The word Gestalt is used in modern German to mean the way a thing has been "placed ...

Psychoanalysis raises many theoretical questions, chiefly on account of its apparent commitment to both mechanistic, reductionist modes of psychological explanation, and a hermeneutical conception of explanation as a matter of grasping relations of meaning.

Freud's psychoanalysis is both a theory and therapy. Sigmund Freud (writing between the 1890s and the 1930s) developed a collection of theories which have formed the basis of the psychodynamic approach to psychology. His theories are clinically derived - i.e., based on what his patients told him during therapy.
