In Populations, Public Health and the Law, legal scholar Wendy Parmet urges courts to embrace population-based legal analysis, a public health inspired approach to legal reasoning. Parmet contends that population-based legal analysis offers a way to analyze legal issues—not unlike law and economics—as well as a set of values from which to critique contemporary legal discourse.

Technology-Based Effluent Limitation Guidelines: Effluent guidelines are technology-based regulations to control industrial wastewater discharges. The guidelines are based on the performance of treatment and control technologies. Currently, EPA has issued 19 industry effluent guideline regulations that contain a limit for lead discharges.

We turn to that in a moment. It is important to bear such practical limits in mind nevertheless, since one possible way to delineate the limits of the law is that such practical limits are the only limits that States must negotiate in its legislative and more broadly legal behaviour, beyond the platitude that it must act in a morally acceptable way. In this sense the immorality of an action or value of the goal to be achieved are none of them sufficient of themselves for state coercion.
