Consumption and household production. Aggregate consumption is a component of aggregate demand. Consumption is defined in part by comparison to production. In the tradition of the Columbia School of Household Economics, also known as the New Home Economics, commercial consumption has to be analyzed in the context of household production. The opportunity cost of time affects the cost of home-produced substitutes and therefore demand for commercial goods and services.

Production versus Consumption. 03/17/2006 George Reisman. There are two fundamental views of economic life. One dominated the economic philosophy of the nineteenth century, under the influence of the British classical economists, such as Adam Smith and David Ricardo. The other dominated the economic philosophy of the seventeenth century, under the influence of Mercantilism, and has returned to dominate the economic philosophy of the twentieth century, largely under the influence of Lord Keynes.
